

Honours Night 2/11/79.

ALBERTON HIGH SCHOOL.

On the eve of another year we are once again gathered at this our annual Honours Night.

Principle Wonderful to attend such an evening..
Guest - Mr. Kellman
In the first instance allow me to congratulate all the pupils who are to be honoured this evening. Your task has been recognised within the preambles of certain competitive limits and therefore an honour is bestowed upon you in recognition of your achievements. Do not forget that you have set your own standard at this young age *in short school days & after school* and that it is this standard that will guide you and be your mark throughout the remainder of your life. *Those who have not even honours - you too - are part of our team & study - Alberton High*
To Mr. Conacher and members of staff, our sincere gratitude for what has been done on behalf of our scholars, the tremendous achievements that have been recorded by individuals and teams throughout the year in various cultural and sporting activities indicates the enthusiasm and zeal of your Staff.

Yes, Ladies and Gentlemen, our children have not only competed among themselves within the boundaries of these school premises and the standard set by our own teachers, but they have competed in the open world with marvelous results bringing honour not only to the school but also to the town of Alberton in many instances. Needless to say enhancing the proudness of parents, teachers and friends.

Let us examine how this has been achieved - how this school in a reasonable short period has become a fully established school and is no longer allowed to bear the excuse that it is but a new school, if pupils succeed it is not a question of luck but a question of inheritant hard work and capability and *high* standard, if pupils have failed and have shown weakness the excuse that it is a new school can no longer be made.

Not perfect we are not allowed to be shortcoming 2/....

Firstly, the willingness, the quality of our pupils is of such a standard that they provide the necessary raw material for our members of staff to teach and coach them in the various fields- those who have obeyed and listened to their Tutors are already beginning to make their mark in their young lives within society and the general environment which they deal.

Second, it has been mentioned that our Principal and members of staff were to be congratulated, this is repeated as they are to be truly complemented for the time and effort given to our youth, many have sacrificed many an hour after normal school hours to enrich our children with cultural and sporting activities. It is certain that they too are beginning to enjoy the fruits of what our pupils and school has achieved in the past. Let us remember Ladies and Gentlemen that if teachers want too they can confine themselves within the limits of the blackboard and books and up to the ringing of the last bell without having to give of their valuable family life and time - in order to enrich our children extramurally. We truly appreciate these efforts.

Thirdly, our P.T.A. - the organisation that is responsible for raising funds whilst at the same time organising certain cultural activities - it is this unstinting effort of our P.T.A. the willing parents who partake with the teachers - that it has been possible to provide our school with the necessary facilities not provided by the Education Department in order to enrich our school and thus our youth.

We say a thank you to our Chairman of the P.T.A. Mr. Brian Spencer-Brooks and his Committee and all those who gave of their valuable time for the well-being of our children, our thank you.

Ladies and Gentlemen at this point I would like to stress that it is the responsibility of each and every parent to support the P.T.A. at every possible opportunity and not to let the few do work for all - this is not the motto of our school " TOTUMEX PARTIBUS". Lastly I mention our Governing Body and wish to express sincere gratitude to the members of this Body for giving of their valuable time in order to assist where necessary and in their

wisdom to guide Mr. Conacher and members of the staff. Thank you.

I also express my sincere thank you to our school Inspectors among whom I must mention Mr. Vermeulen as well as our representative on the School Board Mr. Gordon Munro for all the assistance and guidance given to this School.

Ed. Mene Municipals

Heal Yes, Ladies and Gentlemen "TOTUMEX PARTIBUS" - the whole is the sum of the parts - in other words the whole is as good as the part. It is without any form of hesitation that I say our school is standing up to its motto - all the various organisations, individuals, teams - all those who have to do with our school and that form the individual parts or cogs add up to form this wonderful whole called Alberton High School. It is truly an achievement and I think a wonderful privilege to be a part in this whole - Alberton High School - yes "TOTUMEX PARTIBUS". Thank you.

Many thanks for Amy

CONFIDENTIAL

TRANSVAAL EDUCATION DEPARTMENT

Region : BOKSBURG
Comprehensive Unit : ALBERTON 1
School : ALBERTON HIGH
Inspection Report : THE SCHOOL AS AN EDUCATIONAL INSTITUTION
Inspection Date : 26-29 FEBRUARY 1979
Principal : MR R.C. CONACHER

This report, which consists of a brief summary of the observations and findings of a group of Inspectors of Education who visited the school, is for the attention of the Governing Body of the school. It is intended to provide members of the Governing Body and, through them, the parents of the school, with an insight into the general findings of the Inspectors so that they may be aware of the general state of affairs in the school.

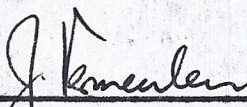

Since this was the first group inspection carried out at the school there is no standard by which to assess whether progress has been made or not. The school has experienced a rapid growth in enrolment and this has necessitated the erection of emergency temporary accommodation. Delays and other problems experienced in the development of school buildings and grounds have caused the principal, staff and parents ~~with~~ more than their fair share of problems. It is therefore extremely gratifying to be able to comment on the progress made in developing the school grounds and providing facilities for teaching and for extra-mural activities.

It was quite obvious to the inspectors that much money and effort had been expended in this field by staff and parents and I have been requested to convey their special appreciation and congratulations to all concerned.

The pupils of the school made a very good impression. They were, on the whole, polite and courteous and made us feel welcome. They are obviously proud to be pupils of this school. Various inspectors made special mention of the excellent general tone and discipline of the school. A pleasant atmosphere prevails in the school - a clear indication of a sound relationship between teachers and pupils. Pupils are obviously making very good use of the facilities provided for them, as evidenced by their participation in various spheres of extra-mural activity with much success being achieved.

The work being done by teachers and pupils was inspected by a group of academic Inspectors of Education. Their findings, comments and recommendations will be conveyed to the principal by means of professional reports for his attention and implementation. Repeated mention has been made of the very satisfactory standard of work being done, of sound and careful preparation by teachers, of effective presentation of subject matter and of good guidance given to teachers by subject heads and the principal. Mention must also be made of the excellent relationship which exists between principal and staff and between staff members individually. This is usually a very reliable indication of a healthy state of affairs in the school. It was also quite clear to us that the principal provides excellent professional guidance to his staff, sets a very high standard of professional behaviour and carries out his many professional duties conscientiously and with great success. The school is fortunate to have as its principal a man of his calibre.

The Governing Body, Parent-Teacher's Association and the parent body in general deserve a special word of appreciation for their loyal and enthusiastic support and for their interest and participation in the various activities of the school. The principal, in his report to the inspectors, makes special mention of the positive role played by all parent groups. It is clear that he enjoys their fullest support in all matters pertaining to the school. The sound relationship which exists between principal, staff, pupils and parents is probably the main underlying reason for our general impression, namely: things are going very well in your school.

J. VERMEULEN
INSPECTOR OF EDUCATION
